RE9 ADVANCED
ANTI-AGING INSTRUCTIONS

MORNING
1. RE9 Smoothing Facial Cleanser
   Cleans, Smoothes, Renews Skin
   Will also remove mild to heavy makeup
   Apply a chick pea sized amount to wet skin. Gently massage face to create suds and then rinse.

2. RE9 Regenerating Toner
   Improves skin tone/firmness
   Spritz 2-3 pumps on a moistened gauze square and wipe over entire face, or spritz directly on face and spread using fingertips.

3. RE9 Intensive Renewal Serum
   Firms/Lifts skin, Diminishes fine lines
   Apply 1 pump to fingertips and gently massage face and neck with gentle, circular motions.

4. RE9 Corrective or Lifting and Contouring Eye Cream
   Reduces puffiness/dark circles
   Apply pin-head sized amount per eye. Using ring finger, dot around your orbital bone and brow bone.

5. RE9 Restorative, Extra Moisture or Lifting and Contouring Cream
   SPF 20 or Restorative Cream non-SPF
   Restores skin’s youthful appearance
   Apply 1-2 pumps and gently massage face and neck in circular motion until absorbed. Avoid eye area.

EVENING
Repeat steps 1-4 replacing step 5 with:

5. RE9 Night Repair Cream
   Supports collagen growth and youthful appearance
   Apply dime-sized amount and gently massage face and neck until absorbed.

FOR NORMAL SKIN: (use package directions)

DAY 1: CLEANSER + TONER - wait a few minutes to see if sensitivity occurs, and if not, follow with eye cream + day/night cream

DAY 2: CLEANSER + TONER, EYE CREAM + DAY/NIGHT CREAM

DAY 3: CLEANSER + TONER, SERUM, EYE CREAM + DAY/NIGHT CREAM
(The serum is the most active - should be introduced once the skin has had a chance to get used to the RE9 Advanced system)

The Instant Lift Gel is an optional treatment - it can be used at your discretion once your skin is comfortable with the system.

FOR EXTREMELY SENSITIVE SKIN:

Start with the CLEANSER and then add a new product to the routine each day:
DAY 1: CLEANSER, DAY 2: TONER, DAY 3: EYE CREAM, DAY 4: DAY/NIGHT CREAM, DAY 5: SERUM (used after the TONER)

WHAT TO EXPECT

• When you begin using a product that actually works to deep clean the skin, you may experience a few blemishes in the first few days of usage. This is NORMAL. The skin is just purging itself of impurities under the surface.

• When you begin using a product that effectively exfoliates dead skin cells, you may experience a little flakiness as old skin is loosened and new cells are brought to the surface.

• You may awaken with an oily shine for the first few days of usage of the Arbonne night cream. After a few uses of the facial scrub, the dead cuticle will be removed and the night cream will be able to penetrate the surface of the skin adding moisture and nutrition to the sub layers of the skin.

• If the RE9 set makes you feel “oily” the first few days, it may mean that you have never felt what it’s like to have pH correct skin. That “moist”, “dewy” feeling is normal – that’s what your skin is supposed to feel like! It’s not necessarily oily; it’s just foreign to you.

• Botanically-based, effective skin care may be new to you and your skin. Use your products exactly as directed for the length of time your consultant advises and then evaluate the results.

Use as directed for 3 days.
